INDIAN  
MILLETS

# PEARL MILLETS

India is the largest producer of pearl millet which is also known as Bhajra. Even though it is a major food crop it is underutilized by many as animal feeds. It was a major prehistoric diet in Indian, Korean and Chinese societies. Pearl millet is gluten less and fat free food compared to other staples. It cures ulcer, improves digestion and increases immunity. Pearl millet is high in iron and it is a remedy for anaemia. It is an exact remedy for the lifestyle diseases prevailing in our world.
